

Your Canadian Source for Production, Assembly, and Automation Equipment

EPSON

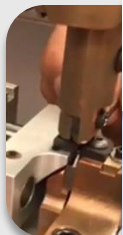

Providing customers more than 300 models of SCARA and 6 axis robots. Improve quality, reduce costs, and increase your bottom line.

Global manufacturer of leak testing equipment Pressure and vacuum decay, mass flow and differential mass flow, helium sniffer and reclaim systems.

TOX USA is a market leader in press driving technology. Pneumatic, hydraulic, electro-mechanic drives, benchtop presses, and TOX joining.

A world leader in laser and resistance welding as well as micro TIG, hot bar, laser marking and weld monitoring technologies

BalTec

A global presence in radial riveting, orbital riveting, and roller forming equipment with process control focused on the best benchmarks in joining

Global leader in the design, development, and manufacturing of high-powered ultrasonic equipment from hand-held units to bench model presses to ultrasonic kits for OEM installation.

Specialists in motion control with the widest range of cam motion control drives available from one source including rotary indexing tables, precision link conveyors, part handlers, and hopper elevators

DEPRAG

With over 88 years of experience. They are a leader in design, build, and distribution of handheld and automatic screwdriving tools, feeding and assembly systems

HOOSIER FEEDER

High quality and efficient equipment that orients parts with vibratory feeders and centrifugal systems. From custom built parts handling equipment to maintenance, service, installation, and repair

ID INDUSTRY DEVICES

Flex feeding system compatible with any robot. Flex Feeding easily tackles high-mix low-volume applications with quick parts changeover and reduced installation time.

Plastic assembly equipment and services done your way. Plastic welding, staking, laser welding, IR welding, hot plate welding, spin welding, and welding stations.
