

Your Canadian Source for Production, Assembly, and Automation Equipment

## EPSON

#1 SCARA Robot manufacturer worldwide and tied for the globe's largest market share of industrial robots, Epson's SCARA and 6-Axis lineup make robotic innovation cost and time efficient.

**CTS CINCINNATI  
TEST SYSTEMS**  
Your Global Leak and Function Test Solution Experts

Global manufacturer of leak test equipment utilizing pressure and vacuum decay, mass flow, helium sniffer, hard vac, and reclaim systems. Standard instruments, custom systems, custom seals, and off-the-shelf solutions for a wide range of manufacturing processes.

## TOX<sup>®</sup>

TOX Pressotechnik is a market leader in press driving technology. Pneumo-Hydraulic, Electro-Mechanic drives, benchtop presses and TOX joining.

## AMADA WELD TECH

The world leader in laser and resistance welding as well as micro TIG, hot bar, laser marking and weld monitoring technologies.

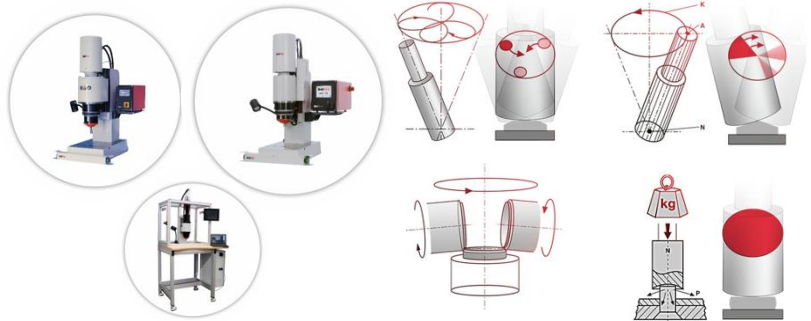

Sonics is a global leader in the design, development and manufacturing of high-powered ultrasonic equipment from hand-held units to bench model presses to ultrasonic kits for OEM installation.

# BalTec

A global presence in radial riveting, orbital riveting, and roller forming equipment with process control focusing on the best benchmarks in joining technology.

Plastic assembly equipment and services done your way. Plastic welding, staking, laser welding, IR welding, hot plate welding, spin welding, and welding stations.

Specialists in motion control with the widest range of cam motion control drives available from one source including rotary indexing tables, precision link conveyors, part handlers and hopper elevators.

# HOOSIER FEEDER™

High-quality and efficient equipment that orients and singulates parts for production and packaging. Mechanical systems including vibratory feeders and centrifugal systems. Robotic systems including flex feeding.
